

BalaChandra Sekhar Kandula

✉ balachandrasedkhark@gmail.com || ☎ (+91) 8106122147 || Ongole

Objective:

To seek and maintain full-time position that offers professional challenges utilizing interpersonal skills, excellent time management and problem-solving skills and to implement my technical skills in real world applications.

Education:

B. Tech (CSE) - Srinivasa Institute of Engineering & Technology (Autonomous) – 2021-2025
CGPA – 7.99

Professional Experience (Internships):

Web Development Intern | TECH OCTANET SERVICES PVT.LTD | December 2023 – February 2024 | India

- Collaborate with the development team to implement changes and improvements for web applications and websites.
 - Provide technical support related to web-based systems to internal teams.
 - Design and development of landing pages.
-

Projects:

Portfolio website

Developed a responsive portfolio website and successfully deployed it in the git.

Weather Forecasting website

A weather forecasting website is build with an existing API call and successfully deployed on netlify

Link: <https://66dda878366cdeacc703f369--monumental-daifuku-40d90d.netlify.app/>

Online Voting System

- I and my team developed an online voting system using python and it is used in simple elections like in colleges and schools.
- This system is designed to automate the election process, allowing voters to cast their votes online through a user-friendly graphical interface.

- The system ensures the security, accuracy, and integrity of the voting process, providing real-time results and reducing the time and resources needed for traditional voting methods.

Creating Alert messages on wild animal activity detection by using Hybrid deep neural networks

- **Developed a Hybrid VGG-19 + Bi-LSTM Network for Real-Time Animal Detection:** Designed and implemented a machine learning model combining VGG-19 for image classification and Bi-LSTM for tracking animal movement, achieving 98% classification accuracy and 77.2% mean Average Precision (mAP) on a dataset of 40,000 images from 25 animal classes.
- **Enhanced Surveillance Efficiency with High Performance Metrics:** Optimized the model to deliver real-time performance with 170 FPS (frames per second), enabling rapid detection and alerting of wildlife activity, ensuring the safety of forestry workers and rural populations.
- **Integrated Alert System for Immediate Response:** Developed an alerting system that sends SMS notifications to local forest offices upon animal detection, enabling quick intervention to mitigate risks associated with animal attacks.

Skills:

- Python
- Web technologies: HTML, CSS, Java Script
- Full stack
- Power BI
- Tableau

Certifications & Training:

- AWS Devops certification through EDX
- AWS Cloud Practitioner Essentials through EDX
- Web development training through NULLCLASS

Extra-Curricular Activities:

Hackathon Participant

- Competed in multiple hackathons, focusing on developing innovative solutions.

Project Expo Participant

- Competed in the project expo held in college on the occasion of Engineer's Day
